Brian,

I hope everything is going well. We are filing a patent application on the callserver architecture, and you are listed as an inventor. We will need your signature to get your name on the patent application, so I need to fax you a couple of documents. What is your fax number?

Thanks, John

Subject: Contractor Agreement

John,

Here's a draft of the contract. It's mostly the same as the original back in September, except for the ownership and competition clauses.

Also,  
I changed it to a weekly system, which is a lot easier for me to work with  
since it's easier to keep track of things, and will give you more of a regular picture as to how things are progressing.

Feel free to let me know if you want any changes before we make it official on Tuesday.

-Brian
